

Forma

Forma

FORMA trasforma la parete in un sistema di grande contenimento progettato su misura, dove estetica e funzionalità si fondono in un linguaggio architettonico coerente.

FORMA transforms the wall into a highly capacious, made-to-measure storage system, where aesthetics and functionality merge into a coherent architectural language.

Ogni modulo può essere combinato liberamente, creando soluzioni continue o segmentate. FORMA può rivestire intere pareti da soffitto a pavimento, dialogare con boiserie e porte o separare ambienti senza interventi murari, trasformando il contenitore in un vero elemento architettonico, funzionale e decorativo.

Each module can be freely combined, creating either continuous or segmented solutions. FORMA can clad entire walls from floor to ceiling, interact with boiserie and doors, or divide spaces without masonry work, transforming storage into a true architectural element—functional and decorative.

FORMA non si limita al contenimento: i moduli possono integrare mobile bar, vani attrezzati e molteplici soluzioni funzionali, progettate per adattarsi alle esigenze specifiche dell'utente, con coerenza progettuale, precisione costruttiva e qualità dei materiali.

FORMA goes beyond storage: its modules can incorporate bar units, equipped compartments, and multiple functional solutions designed to adapt to the user's specific needs, with design coherence, construction precision, and high-quality materials.

Technical sheet

La collezione FORMA è un sistema a parete progettato per integrarsi armoniosamente sia nella zona giorno che nella zona notte. Un insieme di mobili contenitivi concepiti “filo muro”, pensati per trasformare l'intera parete in un volume discreto, quasi impercettibile, capace di celare al suo interno soluzioni funzionali e sorprendenti.

Estremamente versatile, FORMA è disponibile con profondità, larghezze e altezze completamente personalizzabili, adattandosi con precisione a ogni esigenza progettuale. L'assenza di elementi di montaggio a vista contribuisce a definire un'estetica pulita e rigorosa.

Le strutture sono realizzate in MDF laccato o nobilitato tinta unita. Le ante, con telaio in massello di noce canaletto, sono disponibili con finitura cannettata noce canaletto, laccate opache oppure rivestite in cuoio impreziosito da cuciture realizzate con filo in cromia coordinata. Ante con apertura push-pull o con maniglia decorativa in metallo verniciato.

FORMA si completa con una vasta e funzionale gamma di accessori e optional: kit lame di luce con sensore di apertura, ripiani, vassoi estraibili, cassettiere, portascarpe, kit organizzativi, porta bicchieri, fino all'integrazione di un pratico frigo bar con capacità di 35 litri in classe energetica A+++.

FORMA collection is a wall-mounted system designed to integrate seamlessly into both living and bedroom areas. A series of storage units conceived “flush with the wall”, designed to transform the entire surface into a discreet, almost imperceptible volume capable of concealing functional and surprising solutions within.

Highly versatile, FORMA is available in fully customizable depths, widths, and heights, allowing it to precisely meet any design requirement. The absence of visible fixing elements contributes to a clean and rigorous aesthetic.

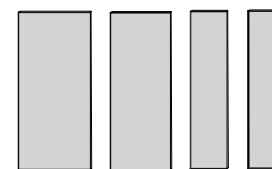

The structures are made of lacquered MDF or solid-color melamine-coated MDF. The doors, featuring a solid Canaletto walnut frame, are available in Canaletto walnut fluted finish, matt lacquer, or hide upholstery enhanced with stitching in a coordinated thread colour. Doors can be opened via a push-pull system or with a decorative painted metal handle.

FORMA is completed by a wide and functional range of accessories and optional features: light blade kits with opening sensors, shelves, pull-out trays, drawer units, shoe racks, organisational kits, glass holders, and even the integration of a practical 35-litre minibar in energy class A+++.
